To: Erin Sheldon <erin.sheldon@gmail.com>

Astrometry: Developing the astrometry code (to calculate residuals for the commissioning and SV tests): may 2011 ~ october 2011 (about 5 months). We used the data challenge simulations, and data from BCS (Bob) and wide Field Imager (Daniel). A few months later we used that code again with SV data.

WL pipeline: I talked to Mike and 1.5 years sounds OK to both of us.

Please let me know if you need anything else.

Thanks,

Andrés
